WHAT IS ECODY®?

Ecody® 是由泰和新材于全球率先推出的节水型绿色印染技术。以天然生物质为原料，赋予纺织品在无盐、少碱、常温条件下快速染色的性能，生态友好、低碳清洁，水资源可实现 100% 循环利用，彻底改变传统印染行业高能耗、高污染、大量高盐废水排放的现状。

Ecody® is an innovative water-saving printing and dyeing technology developed by Tayho. Based on natural biomass material, Ecody® enables textile to be dyed and printed quickly with no salt and fewer alkali in room temperature. It is an eco-friendly and clean technology with lower carbon emissions and water resources to be 100% recycled, thus revolutionarily changes the way conventional dyeing works with high consumption, heavy pollution and huge discharge of waste water.

ADVANTAGES

三大优势

Eco-Friendly
环境友好

Efficient & Flexible
高效灵活

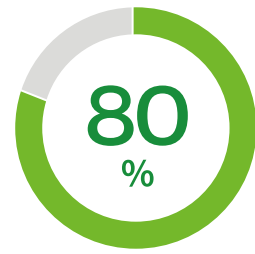

Safe & Healthy
安全健康

环境 Eco- 友好 Friendly

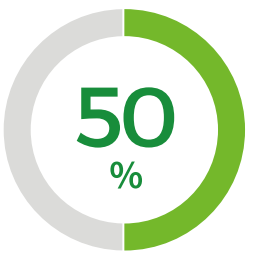

染色用水循环利用 | 减少化学品与染料使用 | 降低能源消耗与碳排放
Dyeing water recycling | Less chemicals and dyestuff used | Less energy consumption and carbon emissions

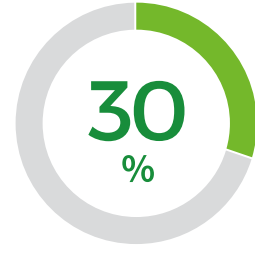

与传统染色相比，Ecody®技术可节约

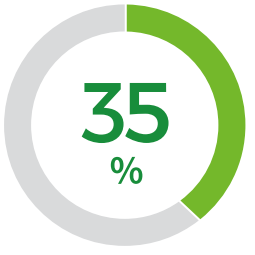

节约用水
Water saving

节约蒸汽
Steam saving

节约用电
Electricity saving

减少碳排
Carbon reducing

高效 Efficient & 灵活 Flexible

按需染色 | 缩短染色时间 | 减少无效库存 | 色彩创意快速实现
Dyeing on demand | Shortened lead time | Less dead stock | Color customization

与传统印花对比，Ecody®印花免上浆，免蒸化，免水洗，印花耗时仅为传统工艺的一半

FABRIC ADVANTAGES

面料特点

面料天然抑菌，达国家 AAAAA 级标准

Naturally anti-bacterial, rate AAAAA

面料染色过程摩擦少，所以成品布面毛羽少

Less friction in dyeing so less surface fluff

布面光洁度高，光泽好

Bright, glossy and shiny

色牢度好，会比传统染色平均高半级

Higher color fastness

布面折痕少，平整度好

Less wrinkle and smoother fabric surface

抗起球效果好，比传统的高半级

Better anti-pilling performances
